Summary

Data Management Specialist and M.Sc. Information Systems student experienced in CRM and ERP data operations — structuring and governing records, enforcing data standards, building validation and automation workflows, and turning operational data into reporting that teams trust. Strong in data quality and governance, SQL, Power BI and advanced Excel, with hands-on experience maintaining a single source of truth across international, cross-functional teams.

Skills

- **Role Focus:** data management & governance, data quality & validation, CRM/ERP data operations, master data structuring, reporting & dashboards, advanced Excel (PivotTables, formulas, macros), SQL, Power BI, KPI reporting, process documentation & automation
- **Data Management & Governance:** data standards & naming conventions, single source of truth, data validation & deduplication, master data structuring, data modeling, CRM/ERP data quality
- **Data & Analytics:** SQL (data retrieval, analysis & modeling), Power BI (dashboards & reporting), Microsoft Excel (PivotTables, formulas, macros), Python (data analysis — working level), data modeling, KPI definition & business metrics
- **Tools & Automation:** Notion, Zapier, Jira & Confluence, Google Workspace, MS Office (PowerPoint, Word), AI workflow tools (Claude, ChatGPT)
- **Ways of Working:** Cross-functional & international collaboration, Stakeholder communication & data storytelling, Process documentation & playbooks, Structured, detail-oriented execution

Core Competencies

Data governance & quality | CRM/ERP data administration | Data validation, cleansing & deduplication | Master data structuring & standards | Reporting & dashboarding | Process documentation & automation

Work Experience

Working Student — NanoTemper Technologies, Munich, Germany

Working Student (Part-time) · Jun 2025 – Jun 2026

- Maintained and updated CRM records in Salesforce, enforcing naming conventions, data standards, and a single source of truth across sales and marketing teams.
- Performed routine data validation checks to identify duplicates, missing values, and inconsistencies, resolving discrepancies to maintain data integrity.
- Configured custom Salesforce fields and workflows to improve data capture, data consistency, and reporting accuracy across commercial teams.
- Built and tested automated Salesforce Flows with conditional logic across multiple triggers, streamlining the lead-to-order process and reducing manual effort.
- Built and maintained reports and dashboards in Salesforce and Excel tracking pipeline health, conversion rates, win rates, and sales productivity for leadership.
- Analyzed lead-conversion and pipeline data in Salesforce and Excel, identifying bottlenecks and delivering actionable findings to sales and marketing stakeholders.
- Enriched and validated prospect data using LinkedIn Sales Navigator, ensuring CRM records met quality standards before outreach and pipeline entry.
- Documented recurring data issues and process inconsistencies, recommending and implementing improvements to support operational excellence.
- Coordinated deliverables and timelines across cross-functional teams in Germany and international markets, ensuring structured and timely execution.

Internship — Acteol (Access Group ERP) – SaaS, Tunisia (UK-facing)

Internship · Mar 2021 – Aug 2021

- Maintained and updated CRM data across multiple client accounts, enforcing naming conventions, data standards, and reliable reporting.
- Queried databases using SQL to retrieve, filter, and analyze client and campaign data, surfacing trends and actionable insights for stakeholders.
- Tested and validated CRM features and workflows in a sandbox environment, identifying inconsistencies and recommending improvements before release.
- Built and customized reports and dashboards in Excel and CRM platforms, delivering clear performance summaries to internal and client stakeholders.
- Conducted routine validation checks to identify duplicates, missing values, and incorrect mappings, ensuring clean and reliable data across accounts.
- Documented CRM workflows and processes in structured guidance materials, enabling clients to independently maintain data quality and run campaigns.

Consultant — International School of Business, Tunisia

Contract · Sep 2022 – May 2023

- Coordinated end-to-end outreach campaigns, managing timelines, follow-ups, and deliverables for consistent, timely execution across channels.
- Analyzed outreach campaign performance in Excel, tracking conversion and engagement metrics and implementing process improvements.
- Maintained accurate prospect records and interaction logs in CRM, ensuring data consistency, completeness, and reliable reporting across the pipeline.

Operations & Growth Team Assistant (Volunteer) — START Nuremberg, Nuremberg, Germany

Volunteer · Oct 2024 – Apr 2025

- Designed and automated onboarding workflows using Notion Forms and Zapier, demonstrating process design and quality-focused thinking.
- Built a structured Notion database tracking 20+ projects and 70 team members, applying systematic organizational and data-modeling skills.

Outgoing Global Volunteer Member (AIESEC) — AIESEC, International

Volunteer · Jan 2021 – Sep 2021

- Selected for an international volunteer exchange, collaborating across cultures and developing cross-cultural communication and adaptability.

Education
